

Currently our office receives a large volume of calls for medication refill requests. In order to process your requests more efficiently, we have provided a dedicated prescription line for your convenience. When calling our office at (772) 299-3003, select option 2 to be immediately transferred to that line. Please make sure you leave a detailed message with your name and telephone number, your medication name, the dosage you take, and what pharmacy and location you would like to use. If it is a mail away pharmacy, please make sure to leave that information as well. Your prescription will be ready within 72 hours of your call pending any problems with your request or the need for a prior authorization. (See Medication Policy/Refill Request)
